Get living!

ZANUSSI DESIGN

At Zanussi, we start the development of all our products in the same way, by looking at the needs of people who are going to use them. Modern lifestyles mean people have less free time, especially in the home so we seek to provide appliances that will help you enjoy your leisure time to the fullest. Zanussi is hard at work to bring new ways to improve the customer's lifestyle so they can get on with the important things in life.

WHAT TO LOOK FOR...

SMART SOLUTIONS

The light bulb symbol points out key features with clever benefits

EASE OF USE

The smiling face symbol points out key features designed to make your life easier

TIME SAVERS

The clock symbol points out where your appliances have been specially designed to help save you time

ATTRACTIVE DESIGN

The star symbol points out specific innovative or attractive design features

ZANUSSI STANDARDS

The Z symbol points out guaranteed Zanussi quality standards

EVERYTHING HAS A REASON

To make life easier, Zanussi has developed a clear information system to help you quickly identify product features. These buttons focus on the innovative features available to make your cleaning tasks easier. Since the beginning, a fundamental interest to the Zanussi brand is coming up with new ways to make life easier.

ZANUSSI

THE RIGHT CHOICE

ZANUSSI INTERACTIVE LCD

The Zanussi LCD gives you a contemporary interactive feature with your cleaning appliance. You can be as involved as you want to be with cleaning through the LCD feature. It provides information on hours of use, overall performance, or when it may be necessary to call for service to keep your power unit at optimum performance.

TRIUMPH FILTRATION

The most important part of vacuuming is what vacuuming removes – things that may harm you and your family. The ultimate in worry-free, clean air is the Z45. Like all Zanussi power units, the Z45 has the highly efficient Triumph filter. However, the Z45 also comes with a True HEPA attachment to purify air 99,97%. So you can clean to not only have a nice looking home, but also to reduce allergy suffering, minimize germs and protect your family.

ILLUMINATED BUTTONS

All units have illuminated buttons. The amount of information shown depends on the model of your Zanussi power unit. Like when to empty the bucket or when it may be necessary to call for service to keep your power unit at optimum performance.

EASY BUCKET

Zanussi has designed the bucket to be easy to use in several ways. It is easy to see the fill level through the bucket window. The bucket is easy to remove by simply pressing the two buttons on the sturdy handles. It is also easy to attach the bucket and know it is on when the latches click into place.

LOOK FORWARD TO CLEANING

CLEANING CONTROL

The Zanussi handle has been designed with an integrated speed control switch. The switch has 4 speed settings to provide you with the right amount of cleaning control when needed.

MULTI-GRIP DESIGN

The Zanussi handle was designed to fit your hand and the way you vacuum. With the open loop handle, you have the ability to position your hand for the best control of the cleaning task.

TAKING CARE

A clean home is important. That is why the Zanussi cleaning tools help you clean all of your home's surfaces, quickly. That way you can get the cleaning done and move onto something you really enjoy.

CLEANING TOOLS

The work is only half done by the power unit. That is why Zanussi offers the complete cleaning system. The Zanussi cleaning tools are designed to work seamlessly with your Zanussi power unit to give you total control over your cleaning tasks and bring clean air into your home.
